Online Test Summary			
Subject	-		
Max. Marks	-	Score	-
Pre-Placement Training Summary			
Pre placement training	9:00 am to 11:00 am - DBMS 11:00 am to 1:00pm –JDBC ODBC		
Faculty	Mr.Hemanth Kumar Mr.Sayeesh	Duration	4 hr
Assessments			
1. Draw schema and ER diagram for student database.			
2. Draw schema and ER diagram for bank database.			
Status:Completed			
Uploaded the report in GitHub		Yes	
If yes Repository name		https://github.com/chetana-H/daily-report-preplacement-training	
Uploaded the report in slack		Yes	

Training snapshots:

The screenshot shows a PowerPoint slide with a red 'REC' button in the top left corner. The slide title is 'Exceptions'. The main content is a list of three kinds of exceptions thrown by JDBC methods:

- **SQLException:** SQLException commonly reflects an SQL syntax error in the query and is thrown by many of the methods contained in the java.sql package.
- **SQLWarning:** object is used to return details about the SQL error or a null if the last exception was retrieved. The getNextException() method of the SQLException object is used to return details about the SQL error or a null if the last exception was retrieved. The getErrorCode() method of the SQLException object is used to retrieve vendor-specific error codes. The SQLWarning throws warnings received by the Connection from the DBMS. The getWarnings() method of the Connection object retrieves the warning, and the getNextWarning() method of the Connection object retrieves subsequent warnings.
- **DataTruncation:** Whenever data is lost due to truncation of the data value, a DataTruncation exception is thrown.

The slide is part of a presentation titled 'JDBC - PowerPoint (Product Activation Failed)'. The bottom of the slide shows a navigation bar with icons for back, forward, and search, and a status bar indicating 'SLIDE 54 OF 54' and 'ENGLISH (INDIA)'.

Assessments:

The assessment is uploaded in GitHub repository and the link is given below:
