Pre-Placement Training Summary			
Pre placement training	9:00 am to 11:00 am – Java Exception Handling		
Faculty	Mr. SharanPias	Duration	2 hr
Assessments			

Status: Completed			
Uploaded the report in GitHub		Yes	
If yes Repository name		https://github.com/chetana-H/daily-report-preplacement-training	
Uploaded the report in slack		Yes	

Training snapshots:

The image is a screenshot of a video player interface. At the top, there is a black bar with a red 'REC' button on the left, and speaker, closed captions (CC), and a three-dot menu icon on the right. The main content area has a light gray background. In the top right corner of this area is the 'ALVA'S Education Foundation' logo. The title 'Difference Between Error And Exception' is displayed in bold red text. Below the title, there are two bullet points: the first defines 'Errors' as something severe enough to cause a crash, and the second defines 'Exceptions' as events in code that can be handled by a programmer. In the bottom right of the content area, there is a small 'Activate Windows' watermark. At the bottom of the video player is a black bar with three circular icons: a muted speaker with a red exclamation mark, a red phone handset, and a screen with a red exclamation mark.

Education Foundation

Difference Between Error And Exception

- **Errors** indicate that **something severe enough has gone wrong**, the application should **crash** rather than try to handle the error.
- **Exceptions** are events that occurs in the code. A programmer can handle such conditions and take necessary corrective actions.

Activate Windows
Go to Settings to activate Windows.
